Summary after attending the IETE Zonal (North) Seminar on ICT in Healthcare at MNIT Jaipur on dated 05/03/2016

This year IETE Zonal (North) Seminar was organised by the IETE Rajasthan Centre Jaipur and Department of ECE, MNIT Jaipur. In this seminar, the total number of fifty seven papers were presented and came participants from the various universities of India. Out of 57, one research paper entitled "Design of Reconfigurable UWB to Dual Band Circular Disc Antenna for Cognitive Radio Applications" was presented by me in the IETE Zonal (North) Seminar on "ICT in Healthcare" on March 05, 2016 at Malaviya National Institute of Technology, Jaipur. I got the best research paper award in Session-I out of session - III in the IETE Zonal Seminar held at MNIT Jaipur. Two expert lectures were also delivered in this seminar by Dr. D. K. Jain and Prof. V. Sinha. I was learned the role of ICT in healthcare and concluded that ICT has a potential to improve healthcare specifically in terms of quality, safety and efficiency. In this seminar the various issues such as reliable and economical healthcare solutions, Information and communication technologies, sensor based healthcare systems, applicable communication technologies, use of signal and image processing in healthcare, VLSI design issues for healthcare products and many more were discussed by the eminent speakers and researchers.

The seminar is beneficial for me and share my knowledge to faculties and students of this college. Therefore, students/faculties may do his/her research in the field of Healthcare technologies.

(Ashok Kumar)
