

Summary of the Programme IAW 2014

(18)

This is the 5th IAW that focuses on advancements in antennas. Advancements in antenna technologies and techniques happening across the globe was discussed and IAW provide the right platform for all the Scientists/Researchers/ Academics to get together to share thoughts, exchange views, ideas and experiments and to define a road map to cope up with the dynamically challenging situation.

This academic event was spread over 5 days is an amalgamation of workshop by eminent professors from abroad, tutorials and invited talks by experts of eminence, technical sessions by experts and quality research paper presentations by researchers.

I was confident that participants was enlightened with the technologies and challenges in antenna design and high quality academic knowledge in the field of antennas while enjoyed the special hospitality arranged by the organizers.

The 5 days complete programme is attached.
